**Training Course: BASIC (Basic Assessment & Support in Intensive Care)**

---

The **BASIC** training course aims to teach participants to rapidly assess ill patients and provide initial treatment and organ support.

The course uses multidisciplinary teamwork simulation and interactive drills, lectures and workshops. The use of manikins assists in making the scenarios more realistic. Effective communication and team work is promoted throughout the course.

The course covers:

- Assessment of Seriously Ill Patient
- Acute Respiratory Failure
- Airway Management
- Mechanical Ventilation
- Arrhythmias
- Transport of the Critically Ill Patient
- Haemodynamic Monitoring
- Shock
- Oliguria & Acute Renal Failure
- Severe Sepsis & Septic Shock
- Severe Trauma
- Neurological Emergencies
- Sedation, Nutrition, DVT & Stress Ulceration
- Arterial Blood Gases
- Cardiopulmonary Resuscitation

**Target Audience**

- Senior Trainees in Medicine, Surgery or Emergency Medicine
- Junior ICU Doctors
- Senior ICU Nurses

Participants are expected to have read the course manual before they attend and to have completed their pre course MCQ paper.

A certificate of attendance will be given on completion of the course and CPD points will generally be available.
