-Patient information may be used for ethics approved research
Westmead Institute for Maternal Fetal Medicine is situated inside the Women’s Health Clinic left inside main hospital entrance.

Nearest train station is Westmead.

Paid parking onsite. Please allow extra time as parking can be very difficult.

Please drink one glass of water 1 hour before your scan.

Previous scans & reports need to be brought with you.

There is 15 minutes of important administrative time prior to scan. Your information will be processed during this time although you may not be in the ultrasound room.

Late arrivals will need to be rebooked at the next available appointment.

Scanning must commence on time, even if other parties have not arrived.

No mobile phone usage allowed in the scanning room.

Generally one support person is allowed in the ultrasound room with the patient. Variations to this are at the discretion of the sonographer.

We ask that you allow the sonographer to concentrate on the scan to get the best and most accurate images of your baby.

While the sonographer may be able to answer some of your questions at the end of the scan, the report will be available after the scans are reviewed and reported on by one of our Maternal Fetal specialist doctors.

You may be required to wait for a consultation with the doctor regarding the findings on the scan.
